

B 260 R I COMBO

Double the cleaning and dominate dirt in half the time

The B 260 R I Combo is a heavy-duty ride-on machine that delivers outstanding cleaning results by combining the power of a scrubber and a sweeper in one. Ideal for manufacturing, warehousing, and transportation environments, this innovative machine tackles both wet spills and dry debris with ease. The B 260 R I Combo features a robust steel frame with enhanced ram protection at the side brushes, making it perfect for demanding cleaning tasks.

Clean more area safely and efficiently

- Powerful pre-sweep function collects large debris ahead of the scrubbing brushes, ensuring a thorough clean in a single pass.
- With a working speed of 6.2 mph, it's perfect for even the largest jobs. And with its large capacity tanks, you can clean longer without stopping.
- To ensure absolute safety when driving in curves, a steering angle sensor monitors the speed and reduces it as required.

Newly developed roller brush deck

- Robust steel housing for maximum strength and durability.
- Rollers can be changed in a matter of seconds without tools.
- Roller brush provides excellent cleaning results with 7 times the contact pressure compared to disc technology.
